

K348 QUICK KILL LV

*Low Volatile, V.O.C. Compliant,
Non-Selective Weed Killer*

Agronomy Liquids

This product is a Low Volatile, VOC Compliant, Non-Selective Weed Killer. It contains two active ingredients. Bromacil, which controls weeds through root contact and gives season long residual control, and 2-4-D which controls weeds through foliage and gives immediate weed burn-down. This weed killer is particularly effective in areas where undesirable vegetation is tall and well-established.

Systematic action allows **Quick Kill LV** to be absorbed through leaves or stems and penetrate to the roots for total kill. Area sprayed will eliminate growth for up to 1 year.

DIRECTIONS: To control most weeds for an extended period of time on non-cropland areas, such as: parking lots, fence rows, loading ramps, railroad sidings, storage yards, around buildings and industrial plant sites, apply one gallon undiluted per 1,000 sq. ft. (43.5 gallons per acre). To control annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, cheatgrass, broomsedge, ragweed, lambsquarter and turkey mullein, apply one gallon undiluted per 1,000 sq. ft. (43.5 gallons per acre). For other hard-to-kill perennial weeds and grasses, such as johnsongrass, saltgrass, bouncing bet, bracken fern and horsetail, apply one gallon undiluted per 1,000 sq. ft. (43.5 gallons per acre).

FEATURES:

- * Low Volatile
- * VOC Compliant
- * Non-Selective
- * Soil Sterilant/Residual
- * Fast Burn-Down Of Weeds
- * Oil-Based
- * Available In 5G1 Pail & 55G1 Drum

ACTIVE INGREDIENTS:

Bromacil: 0.61%
Isooctyl Ester Of 2-4-D: 1.10%

APPLICATION: May be used to kill most weeds and grasses on parking lots, fence rows, loading ramps, railroad sidings, storage yards, around buildings and industrial plant sites.
